

ATRIA N48 A (AT, B)

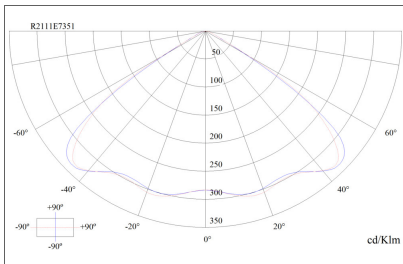

Code: ATJ0200000

ATRIA 48 (AT,B)

ATRIA CEILING/WALL

Description:

Emergency luminaire for installation at significant heights and in large indoor spaces. The frame, manufactured in aluminium, in addition to the heat sink is the support for the electronic system, the batteries and the optical group. The combined use of specific lenses and aluminium-coated reflectors ensure optimum performance in open area lighting and escape routes. Suitable for mounting on walls or ceilings. It consists of 4 or 8 LEDs with independent lenses that are illuminated if the mains fails. An internal microprocessor checks the status of the device and periodically performs functionality and autonomy tests and reports the status using the two LED indicator lights that it includes. The tests can be requested manually by means of an ON Remote Control order when connected to the mains.

Characteristics:

Format: Atria
 Operation: Non-maintained LED AutoTest
 Duration (h): 1
 Emergency lamp: MHBLED
 Charging indicator: LED
 Protection rating: IP43 IK04
 Electrical insulation: Type II
 Test device: AutoTest
 Remote control connection: Yes
 Battery type: LiFePO4

Finishes:

Optical group: Open area on ceiling
 Colour: White
 LED Colour Tone: Cool white (6000°K-7000°K)
 Voltage: 220-230V 50/60Hz

Photometry:

Luminous flux in emergency (lm):2500
