

La Plus Belle

By Philippe Starck

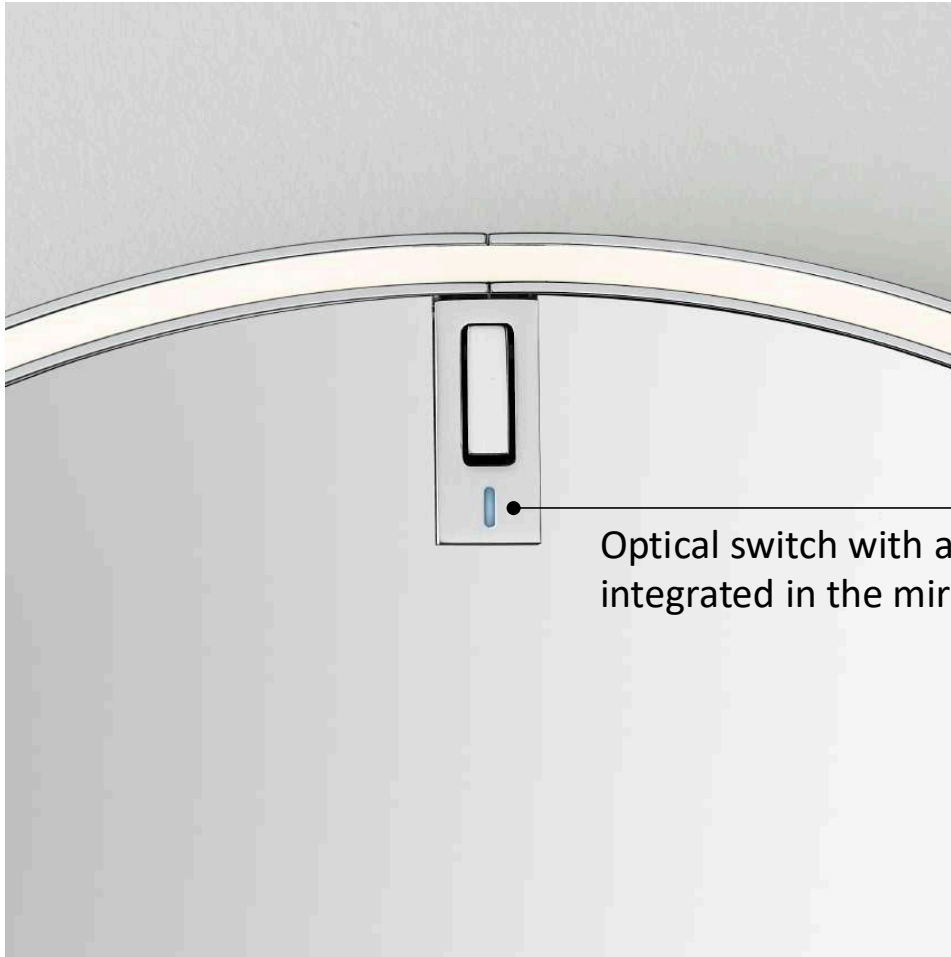

FLOS

La Plus Belle is designed to provide the best possible light. Special LEDs are hidden beneath the optical silicone diffuser, assembled in a very frequent mode to increase the uniformity of the diffusion and provide a unique performance thanks to the exceptional combination of a chromatic rendering index (CRI) of 95 plus a reds stability indicator of over 90 (R9>90). Furthermore, the light from La Plus Belle is pleasant and soft (2700K) as well as manageable by the dimmer with a sensor integrated in the mirror.

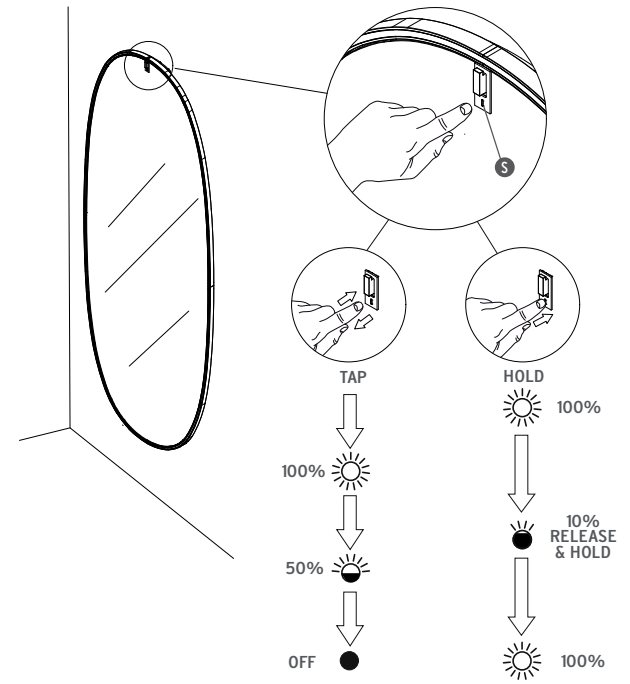

FLOS

The wall fixing system allows you to hang the mirror like a picture

The bottom of the mirror is fixed to the wall thanks to a magnetic fixing system

FLOS

The frame of La Plus Belle is made of a special aluminium alloy that provides the best possible extremely high quality anode colourations. The finishes available are brushed anodised (gold, copper) or polished anodised (bronze, natural aluminium).
