

24 Karat Blau
AXEL SCHMID 2005

Metal, four gold leaf plates sealed in acrylic glass. The shades have four holes each, with which they can be suspended on the rods in various angles. The shades for 24 Karat Blau are made individually by hand. The gold leaf on the shades is beaten to a thickness of 1/10.000 mm, corresponding to 1.000 atomic layers. This allows short-wave blue light to pass through the molecules, with a warm yellow-gold light reflected inside the shades. Products in the "Essentials" category are usually available for immediate delivery.

Light source

Socket E 27 (max. 60W), compatible with bulbs of the energy classes A++ - E.
For halogen or LED string bulbs.
