

# La Hutte

Design by matali crasset

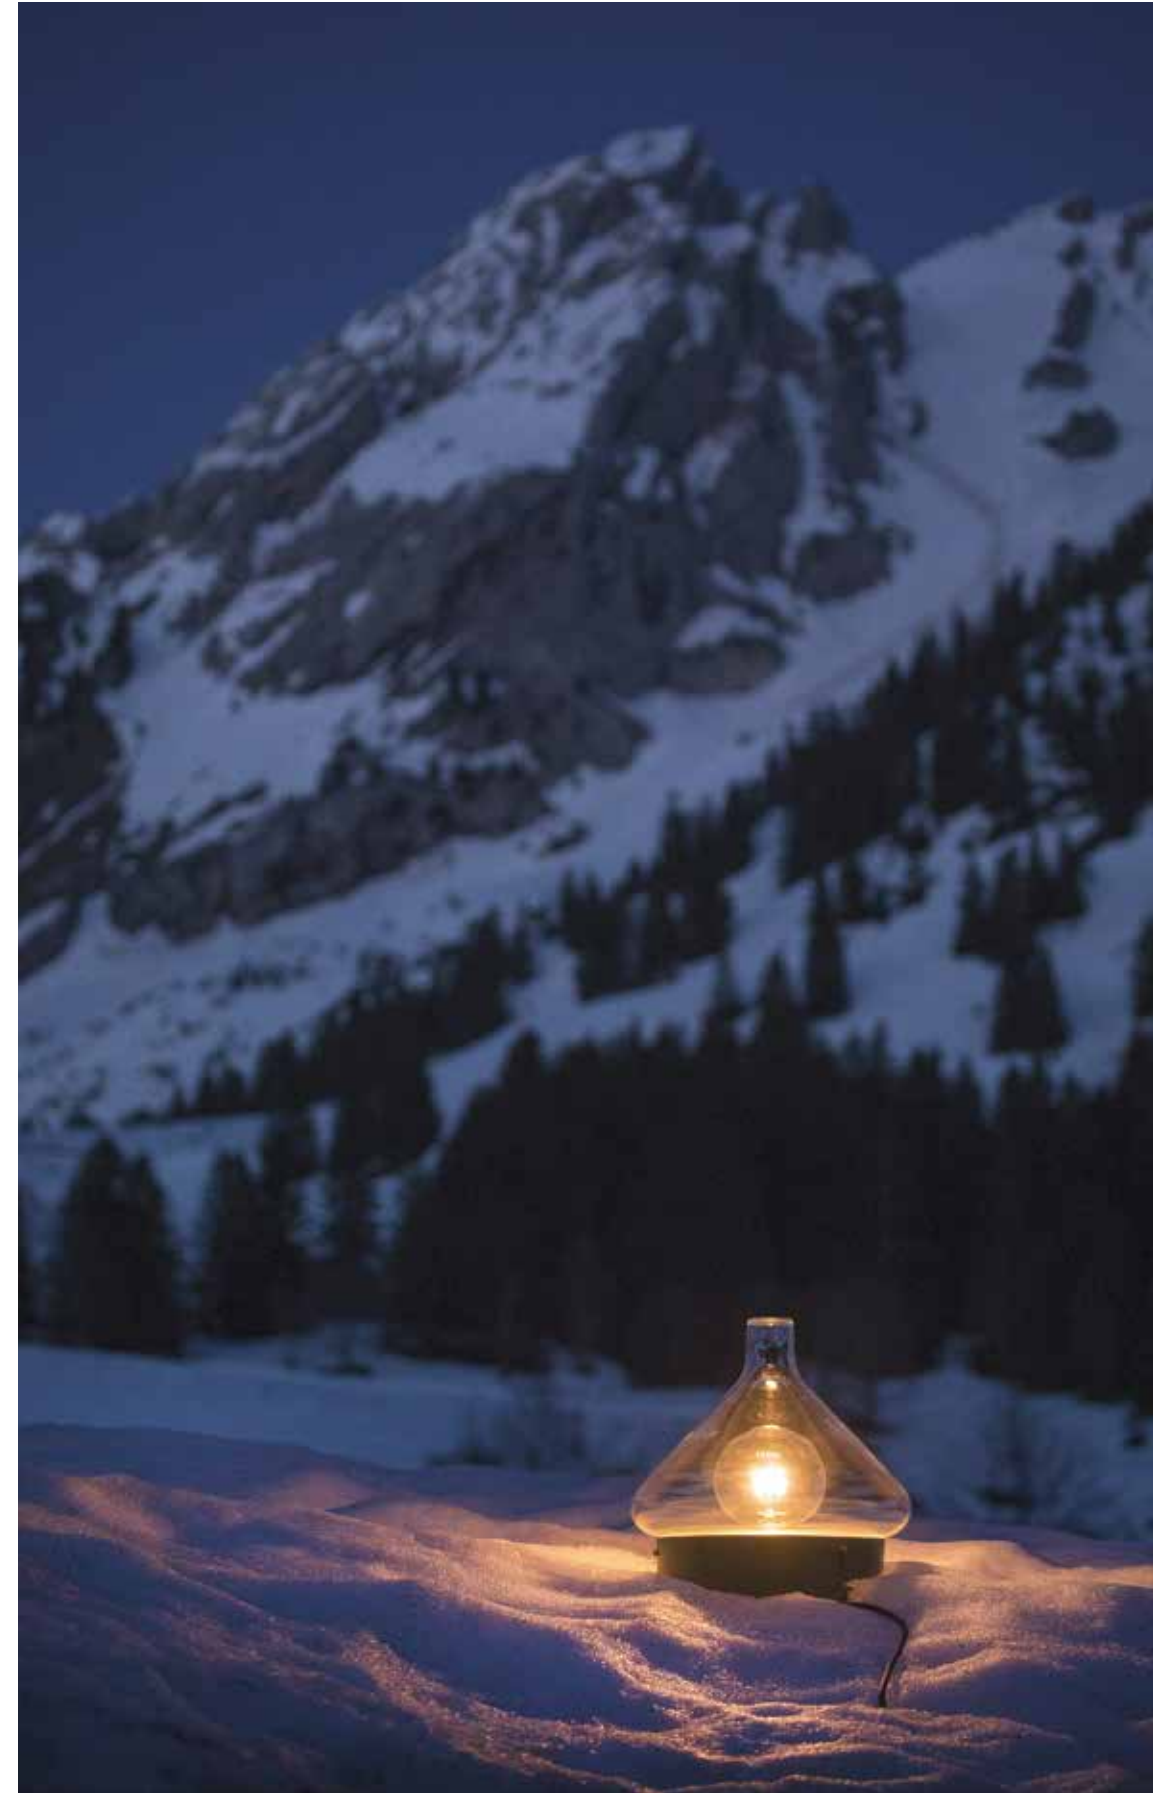

---

The "La Hutte" lamp draws inspiration from the shape of a primitive hut, a circular shelter built around the fire that was essential to life.

Its protective glass casing is like the walls of a house, storing and then releasing photons. "La Hutte" is a shelter, a kindly presence that reproduces the warmth and light of a home fire.

The lamp consists of two elements: a metal base available in all colours, and a transparent blown glass upper.

The design comes in three versions, either a table lamp, a model you can hang, or a floor lamp.
