

Random Solo,
Design by Chia-Ying Lee

Model Random Solo 18

Six perfect spheres floating in the air like gentle glass bubbles. Random Solo revisits the concept of the Random suspension lamp by parting the original three-piece cluster and releasing the individuality of the spherical shapes, which float like bubbles of light, letting you imagine compositions of luminous harmonies. Thanks to the new 10 cm size, there are now six dimensions and seven different finishes available, offering ample styling freedom, both as individually suspended light points and in lightweight and lively combinations on clusters.

Ecodesign Regulation

The LED-only light source contained in this fixture must only be replaced by the manufacturer, its support service or similarly qualified personnel.

The LED driver contained in this fixture must only be replaced by the manufacturer, its support service or similarly qualified personnel.

Cluster suspension lamps must be installed on a canopy: find out more on lodes.com/en/canopies

Photometric data

The figure displays eight color difference charts arranged in a 4x2 grid, comparing two paint finishes (CD-C80 and CN-C20) for eight different colors. The charts are organized into two columns and four rows. The left column shows the color difference for CD-C80 / CN-C20, and the right column shows the color difference for CN-C20 / CD-C80. The colors are arranged in two rows: Clear and Frosted White (top), Chrome and Glossy Smoke (middle), Gold and Rose Gold (bottom).
